The Caregiver's Army

May the Dove of Peace go with you and travel all over the world carrying the name of the Caregiver's Army with him. We can bring peace into the hearts of all Caregivers in the world.

OUR MISSION STATEMENT

To make people aware of the tragedy of Alzheimer's, and the terrible stress it puts on families and Caregivers around the world.

The Caregiver's Army has launched a worldwide petition for the dementia victims and their caregivers. The goal is to collect one million signatures, which will be presented to Congress. The signatures will show our government that many of us are concerned about this growing disease. We will ask for more funds, and a higher priority for Alzheimer's research.

There are four million people in the USA that have Alzheimer's. For every person that has the disease, many others are affected: family, friends, and caregivers. Ohio alone has over 200,000 people that have Alzheimer's,

and it is predicted that, by the year 2025, over 300,000 will have the mind robbing disease. That's about a 50% increase. I don't want to see our future generation having to experience what we are going through now.

WILL YOU JOIN THE ARMY IN THE FIGHT AGAINST THIS TERRIBLE DISEASE THAT MAY ONE DAY TAKE YOUR LOVED ONE?

In contrast to many other diseases, Alzheimer's and related dementias ROB THE MIND, and the victim comes to need help with all daily activities. It is a horrible disease, and it does not just affect the very old people.

WE NEED MANY SIGNATURES TO HELP THE GOVERNMENT RECOGNIZE THAT ALZHEIMER'S IS A SERIOUS PROBLEM THAT NEEDS TO HAVE HIGHER RESEARCH PRIORITY.

YOU....can reach people that I cannot. Help us get the word out, collect signatures that are needed to make a difference. Anyone can sign the

petition on the Internet at the Caregiver's Army website:
<http://www.caregiversarmy.org>

PLEASE HELP US IN THIS EFFORT.

Those of us who are caregivers are also victims of Alzheimer's, and we are stressed and tired. We have been robbed, and unless we do something about it, the robber, will continue, threatening all of our children and grand children. Without increased research efforts, it may take years before a cure of treatment is developed and then approved for widespread use. Help us push for more research. Help the ARMY, the ARMY is trying to help all of us.

God Bless You,

Carolyn Haynali
